

Fabric Flowerpots

Project courtesy of Jo-Ann Fabric and Craft Stores

Supplies:

- 54"-wide Waverly Sun N Shade fabrics, $\frac{1}{3}$ yard each of 2 coordinating prints
- Matching thread
- Basic sewing supplies (pins, scissors, tape measure)
- Sewing machine
- Iron and ironing board

Instructions:

1. Cut a 10" x 18" rectangle from each fabric.
2. For each rectangle, sew short ends (right sides) together, forming a tube with $\frac{1}{4}$ " seam allowance. Leave a 2" opening in the middle of the lining seam. Press seam open.
3. For both lining and exterior, press tube flat with seam in the middle and sew one end together with a $\frac{1}{4}$ " seam allowance to form bottom of pot.
4. Form gussets by matching bottom seam to fold on one side and flatten, forming a point. Draw a mark at the fold on each side, 2" from the point end, and draw a line between the marks, forming a triangle. Sew along the mark and trim off the excess triangle. Repeat on other side.
5. With right sides together, drop

lining into fabric flowerpot, pin the top edge and sew all around.

6. Turn inside out through lining's side seam, push lining into flower pot, and press as needed. Turn top

of flowerpot down to form cuff.

7. Fill fabric flowerpot with potting soil and a plant.
